Making a difference on inequalities in a time of austerity – can evidence help?

"In a time of Populism, Brexit and Trump...."

Dominic Harrison @BWDDPH

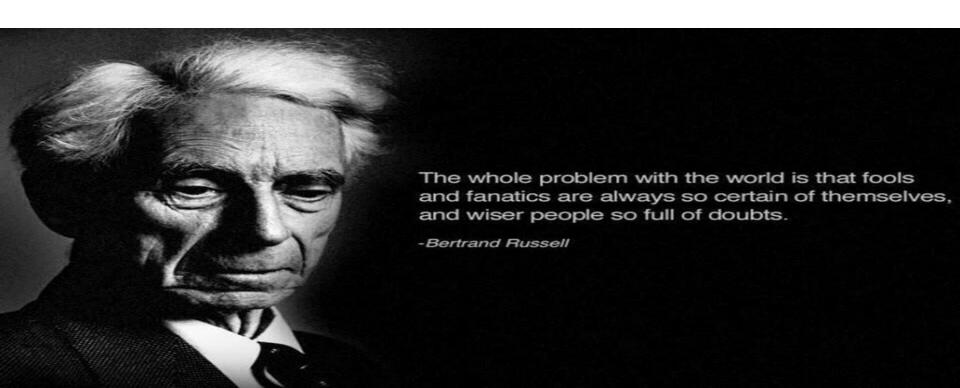

Populism

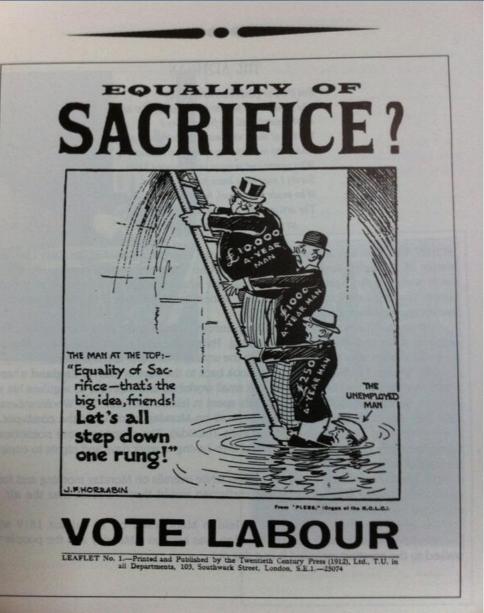

"support for the concerns of ordinary people"

"the quality of appealing to or being aimed at ordinary people."

"Populism is a political doctrine that proposes that the common people are exploited by a privileged elite, and which seeks to resolve this..."

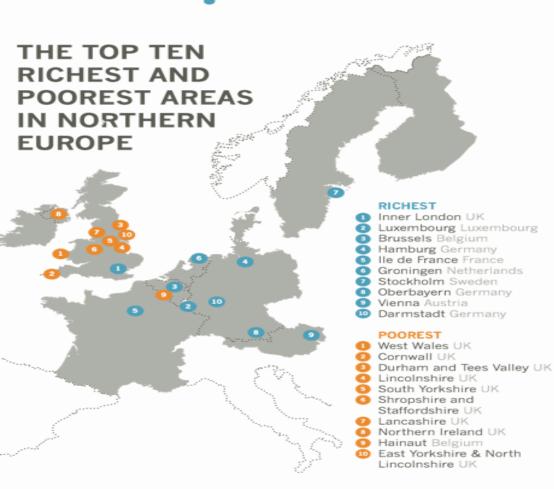

...a lot more of this is happeningit will get worse...

The poorest regions in the UK are the poorest in Northern Europe

What does this mean?

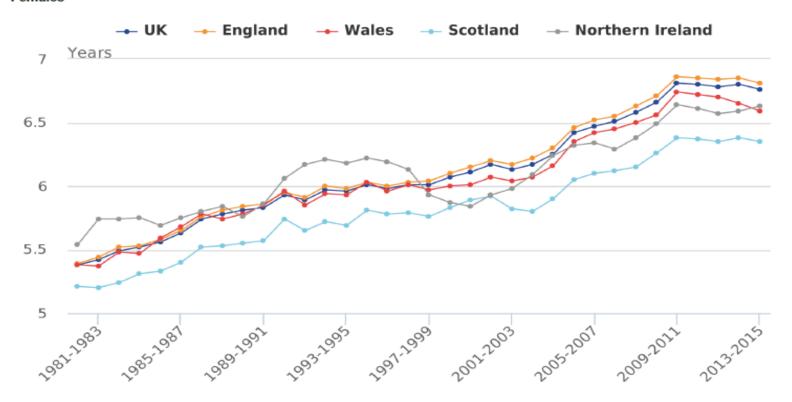

In the UK we think of ourselves as having similar standard of living to other countries in Northern Europe like France, Germany, Belgium, Holland and the Nordic Countries. These are our nearest neighbours. They share a similar economic history to us, and have experienced similar political stability since the second world war. We also have close ties as members of the European Union.

However, the poorest UK regions are by far the poorest in Northern Europe. This is because the UK is much more unequal than other countries. where there is nowhere as rich as London, but nowhere as poor as our poorest regions.

In 2016 Life expectancy is now going backwards in some northern LA areas (for the whole population) especially for those most dependant on the health and care system (i.e. aged over 85Yrs)

Figure 2b: Life expectancy at age 85, UK and constituent countries, 1980-1982 to 2013-2015

National government

Responsible for national strategy, legislation and policy on the public's health and other decisions that influence the wider determinants of health

The NHS

Responsible for supporting patients to live more healthily as well as delivering health improvement interventions such as NHS Health Checks and support to stop smoking. The NHS also delivers specific public health services such as vaccinations and screening. A radical upgrade in prevention is to be reflected in the new place-based plans

Local government

Responsible for improving the health of people in their area, addressing the full range of factors determining good health and developing healthy and sustainable communities

Scientific and academic community

Apply scientific knowledge, methods and advanced technology to the prevention of disease and protection of the population against threats to health

THE PUBLIC

Make choices
around their lives and health,
and are affected, informed
and influenced by their physical
and social environment.
Supported by local and national
government, the NHS,
businesses, the voluntary and
community sector and directly
by PHE through its
behaviour change and
social marketing
campaigns

Voluntary and community sector

Influences the public's health by providing people with services, volunteering opportunities, employment, goods and information. Provides advocacy for specific public health concerns

Global public health

Collaborating internationally to identify and address threats to health

Industry

Influences the public's health by providing people with employment, goods, services and information

Public Health England

- protects the country from threats to health, including outbreaks of infectious diseases and environmental hazards, in the UK and abroad
- improves the public's health and wellbeing
- · improves population health through sustainable health and care services
- · builds capacity and capability of the public health system

Through:

- · application of evidence into practice, and influencing public health policy
- a place-based approach that engages local communities, building on their assets and addressing the wider determinants of health, including the built and natural environment
- a life course approach, promoting a holistic view of an individual's total health and wellbeing needs at every stage of life, seeing public health as one system for improving health and wellbeing
- leading the response to incidents involving infectious dieseases and environmental hazards

Q1 : Can we name 'the systems' that are killing us in England?

Evidence-informed decision making involved integrating the best available research evidence into the decision-making process.

Additional factors, community health issues and local context, community and political preferences and action and public resources, create the environment in which that research evidence is interpreted and applied."

Figure 1. A Model for evidence-informed Decision Making in Public Health, taken from the World Health Organisation

Populism in Practice: Eric Pickles MP & The Daily Mirror

In 2014, Chelmsford Crown ourt heard a maintenance am at Brentwood School was orking to replace components n a bay window of a residen-

al flat within the grounds. A 63-year-old employee was orking on the roof of the bay window when his foot got caught and he fell approximate-

ly 2.6m to the ground below. He was rushed to hospital and found to have suffered injuries including a broken collarbone and chipped vertebrae.

Brentwood School Charitz ble Incorporated Organisation Brentwood, pleaded guilty t breaching Regulation 4(1) of the Work at Height Regulation o 2005, and was fined £40,000 an ordered to pay £1,477 in costs.

MP blasts NHS for treatment cut plans

A TORY MP has said there is a danger of "care by spreadsheet" as Brentwood and Basildon residents face treatment cuts as the clinical commissioning groups (CCG) try to plug a multi-million pound

The proposed cuts come after the CCG said a rise in demand for services mean they are facing a £14 million deficit this year and

According to the CCG. the rapid demographic change has led to increasing pressure on health and care services which are not set up to cope with the corresponding growth in demand.

Because of the financial situation, the CCG is reviewing the local Service Restriction Policy, and will assess the changes before enforcing them.

Pain treatments are among the NHS services that face the axe, with the CCG proposing to stop funding of pain insert procedures including facet joint injections, hip and spinal injections and spinal cord stimulation.

Tory MP for Brentwood and Ongar Eric Pickles has said he does not agree with all decisions by the

He said: "I have met with

Speaking out - MP Eric Pickles is concerned over healthcare

the Basildon and Brentwood public meetings. CCG's accountable officer John Leslie to discuss the decisions the organisation is having to make.

"I am not saying everything they are doing is wrong, but the CCG does need to think long and hard about its primary role.

"It is supposed to be

treating people who are in pain, or have other conditions which affect their day-to-day lives.

"There is a danger this is care by spreadsheet rather than care by need. If people have to live their lives crippled by pain rather than being allowed to enjoy themselves, it does not seem sensible to me."

Other services including travel injections, simultaneous joint replacements, cataract surgeries and programmes to help patients stop smoking have been judged to not cater to the wider needs of the population and to be of limited clinical value.

The CCG is also proposing that some treatments and procedures are subject to tighter restrictions than currently, including gallstone surgery.

A formal consultation has been launched, and residents are invited to have their say at a series of

There is one on Friday. August 26 from 1pm at Emmanuel Church Hall, in Billericay.

Alternatively, you can express your views online with the consultation by visiting basildonandbrentwoodccg. nhs.uk/fit-for-the-future.
